

COOPER 1000

The Cooper 1000 “Koeper” is an exceptionally well-equipped and spacious tender sloop for those who want to combine comfort, style, and performance. With a length of 10.30 meters, this Cooper offers a remarkable amount of space on board, while its distinctive Dutch design gives it a sporty and timeless look. The Cooper 1000 is also the largest model in the original Cooper range and was developed by the shipyard with longer trips and multi-day stays on board in mind.

This 2019 Cooper 1000 is equipped with the powerful Yanmar 4LV250, delivering a whopping 250 pk. This is the most powerful engine ever supplied for the Cooper 1000 and ensures excellent performance and impressive acceleration. The boat reaches a top speed of approximately 27 km/h, while a comfortable cruising speed of about 19 km/h is possible. The engine has only 420 operating hours.

What makes this “Koeper” particularly appealing is its very comprehensive equipment package. It features Zipwake trim tabs, an electric bow thruster, Garmin navigation and chartplotter, an electric anchor winch, and a 2,000-watt inverter. The combination of the powerful engine and Zipwake makes it possible to cruise the boat both leisurely and sportily.

There’s no shortage of comfort either. The cockpit is equipped with genuine teak, a comfortable cushion set, a cockpit table, multiple sunbeds, an outdoor shower, and a

swim platform with an integrated swim ladder. For longer days on the water, there are two refrigerated drawers. Inside, the boat features a modern and bright interior with a fixed berth for two people, cabinet space, a sink, and an electric toilet in an enclosed compartment.

A particularly important advantage is the care the boat has received from its current owner. In the summer, the Cooper has always been stored in a boathouse, and during the winter, she was kept in a heated storage facility. This means the boat has been significantly less exposed to the elements than a boat that remains outdoors year-round. Combined with the relatively low operating hours, this provides an exceptionally attractive starting point for her next owner.

The Cooper 1000 is known for its combination of design, functionality, and customization. The shipyard describes the models as sporty tenders with a distinctive Dutch design and great attention to detail. The 1000 was specifically designed to allow for comfortable stays on board for several days.

This makes the ‘Koeper’ an excellent choice for water sports enthusiasts who refuse to compromise. A powerful 250 pk Yanmar diesel engine, a high level of comfort, extensive technical equipment, and meticulous storage conditions make this a Cooper 1000 that you definitely need to see.

This boat is stored in a boathouse and is available for viewing by appointment.

DETAILS
